

A man with short brown hair and a beard is shown from the chest up, wearing a bright blue quilted jacket. He is looking down and slightly to his left. The background is a blurred sunset or sunrise over water, with warm orange and yellow tones. The PING logo is visible on the left chest of the jacket.

AUTUMN / WINTER 2019

 PING®

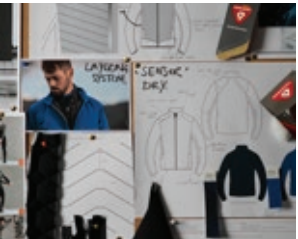

AUTUMN / WINTER 2019

Golf. We never stop thinking about it. From the moment Karsten Solheim invented the Ping 1-A putter back in 1959, we've been a leading innovator in golf.

The Autumn/Winter 2019 collection takes inspiration from our brand's heritage and founder, Karsten Solheim, and his design principles.

We believe form follows function, and that design should derive directly from its purpose. We embrace these design principles and strive to create the ultimate golf apparel, engineered for the modern-day golfer.

ENGINEERED TO PLAY

When we set out to design a new collection, we have one thing in mind; create beautiful garments engineered to play the game of golf – to enhance the comfort and performance of the golfer in all playing conditions.

This season, we continue to explore and incorporate the latest innovations, fabric technologies and manufacturing techniques to continually improve our collection. We don't follow fashion; we lead by creating a range that stays true to our core values.

The Sensor Technology Platform is a system that ensures the clothing you wear on the course works with your body, as well as the demands of the game. The platform consists of Sensor Cool, Sensor Warm and Sensor Dry technologies.

SPACE AGE TECHNOLOGY

NORSE PRIMALOFT® VEST

COULD ULTRA-LIGHTWEIGHT FABRIC TECHNOLOGY USED BY NASA REALLY IMPROVE YOUR GAME?

The Norse PrimaLoft® Vest pushes the limits of lightweight warmth with PrimaLoft® Gold Insulation with Cross Core™ Technology.

PrimaLoft® Gold Insulation with Cross Core™ Technology is a revolutionary fusion of PrimaLoft® insulation, with silica aerogel that results in previously unattainable levels of warmth and comfort protection, never achieved before with a synthetic insulation.

Acclaimed for its ultra-lightweight and insulative properties, silica aerogel has long been used by NASA scientists in aeronautical applications.

RAIN? WHAT RAIN?

SENSOR DRY 2.5 WATERPROOF SUIT

MINIMUM WEIGHT MAXIMUM PROTECTION

The Sensor Dry 2.5 suit provides the ultimate waterproof and windproof protection from all the elements. Air permeable and lightweight, stretch fabric ensures true breathability and no distractions during the round, whatever the weather.

Developed with Tour Staff to be extremely lightweight and quiet for minimal noise distraction on course.

ANDY SULLIVAN
PING APPAREL AMBASSADOR

sensordry™

TIGHTLY WOVEN FABRIC PRODUCES A HIGHLY WATERPROOF AND BREATHABLE SUIT.

4 WAY STRETCH & ABRASION TAPE FEATURE ON BACK SHOULDERS FOR VISUAL IMPACT

LASER CUT CHIN GUARD AND MOULDED ZIPPER TO LOCK AND SEAL THE TEETH FOR MORE RAIN PROTECTION AND DURABILITY.

2 FRONT ZIP POCKETS AND ADJUSTABLE HEM AND CUFFS

INTELLIGENT LAYERING

The Sensor Dry 2.5 jacket layers perfectly with the Norse PrimaLoft® Vest on cold and wet days for ultimate warmth and water protection without bulk or restriction.
